

Calculate your birth chart in 7 easy steps

You will need:

- A device with internet access
- Access to your email account
- Your date, time (to the minute e.g. 7:28pm) and place of birth (town or city is fine, we don't need map coordinates. For example, 'Melbourne, Australia')

Step #1 - use Google to search 'astro charts birth chart calculator'

Step #2 - Click on the first result and then click 'sign up' in the top right-hand corner of the screen

Step #3 - fill in the sign-up form (email and pick a password) and then go to your email to confirm your email address (this link should re-direct you to the website, where you can then complete step # 4)

Step #4 - from your User Dashboard, select "Chart settings"

Step #5 - Select "Houses" and switch the house system to 'whole sign (oldest)'

Step #6 – Click ‘apply’ and then go back to the menu and click ‘birth charts’

Step #7 – Click the ‘Add Chart +’ button to be taken to the site’s birth chart calculator and proceed to enter your details as prompted

Note: this website is American, so it will ask for month/date/year, rather than date/month/year. So, for example, if you were born on the 6th April 2007, you would enter it as 04/06/2007 NOT 06/04/2007

When you are done, click ‘create chart’
